Iradukunda Fils

AI & Data Engineering Training & Intern

Email: iradukundafils@example.com | Phone: +250 78X XXX XXX

Professional Summary

Enthusiastic AI & Data Engineering trainee with hands-on experience in developing efficient data solutions. Passionate about collaborating on Gen AI and foundational AI models, building data pipelines, and implementing data quality assurance for reliable insights. Adept at adapting to team environments and eager to apply data engineering skills within a global, innovative context at Refonte Learning.

Skills

- Python, Java, SQL

- Data Modeling & ETL Processes

- Data Pipeline Development

- Quality Assurance & Data Accuracy

- Collaborative Teamwork & Problem Solving

- Big Data Technologies (e.g., Hadoop, Spark)

Experience

Self-Directed Projects

Full-Stack Developer | Jan 2023 - Present

- Designed data models and implemented data pipeline solutions to support web and AI-driven applications.

- Developed ETL processes to streamline data flow and maintain high data accuracy.

- Created data visualizations to communicate insights effectively.

Freelance Development

Web Developer | Aug 2022 - Present

- Collaborated with small businesses to build customized data solutions and enhance database structures.

- Conducted data quality checks to ensure consistency and supported efficient data management.

Education

A-Level Certificate

Apaer Institute, Rusororo

Graduated: December 8, 2024

Online Course: AI Career Essentials

- Developed foundational knowledge in artificial intelligence and data engineering.

Projects

- Blog Post Project: Built a dynamic blogging platform showcasing data management and UI/UX principles.

- Recruitment System: Developed a recruitment system emphasizing data modeling and ETL processes.
